

Muhammad Rizwan Khan

(732)-688-8469 | rizhkh@gmail.com | [GitHub](#) | [LinkedIn](#) | [Website](#)

A recent graduate with software-developer oriented set of skills such as problem solving, logic building and analysis, extensive project development and expertise in programming, looking to land a full-time position where I can learn, contribute and grow

SKILLS

Programming Languages

Android Programming, C, C++, HTML/CSS, Java, JavaScript, Python, SQL

Operating Systems

Windows, Linux, Unix, Android, iOS

Tools/Frameworks

AWS, Android Studio, Apache Tomcat, BitBucket, CRM, EC2 instances & RDS, Eclipse, Git, Gradle, JIRA, Matplotlib, MySQL, NumPy, Putty, PyCharm, Scenebuilder, Scikit-learn, Selenium, Spring Boot, Spring MVC, Vim, Visual Studio 2017 & MS SQL server

EDUCATION

Rutgers University

Bachelor of Science – Computer Science

Concentration: Software Engineering, GPA: 3.6

New Brunswick, NJ

January 2019

EXPERIENCE

TRC Companies Inc., Woodbridge, NJ

Summer IT Intern

May 2018 – August 2018

- + Tasked with building a scalable solution for automating and monitoring data entries into the system that would help company save time by 40 percent by tracking files and logging time with respect to various data
- + Aided the development of the platform using Selenium API and Python 3.0
- + Developed process flows for databases implemented for MS CRM Dynamics
- + Assisted in building business tools and customizing various features for CRM Dynamics
- + Upgraded test and product databases for new fiscal year programs
- + Collaborated on multiple projects using JavaScript, Python, SQL, MS CRM Dynamics, MS SQL server and JIRA

Best Buy, Manalapan, NJ

Customer Service Specialist

October 2014 – January 2017

- + Provided consultation and computer diagnostics to clients on hardware and software issues, managed business operations for customers
- + Responsibilities included but were not limited to: Account merge, order placement on phone, bill payments on account and credit

PROJECTS

Map Search - [GitHub](#)

- + Developed a map searching application to find, track and optimize the shortest possible route between two locations
- + Utilized space-optimized A* search algorithm using heuristic values for better performance by effectively calculating the distance between locations and checking optimality of memory usage and route taken by user
- + Used: Java, Swing, Manhattan and Euclidean distance, Eclipse

Image Processing - [GitHub](#)

- + Used Machine Learning modules from Scikit-learn API and Bayes Theorem to develop an object-detecting application to determine correct probability of whether an image processed is a number or a face
- + Applied the provided data set to determine the correct frequencies and used newer data by applying it to the next set in process cycle
- + Architected the design of the application using Python
- + Used: Python, Scikit, Naïve Bayes, numpy

Bit Torrent Client - [GitHub](#)

- + Developed an application that optimizes the process of sending small encrypted data packets securely server-to-server
- + Data transferred securely with each data packet encrypted and identified by a unique identification number with different packet size
- + Implemented TCP and encryption keys by utilizing provided modules from socket server framework
- + Used: Python, PyNaCL Module, socket, pycharm

Chess - [GitHub](#)

- + Designed a functional game built on Android platform by developing Android (Gradle) and Javafx on Android Studio
- + Engineered a well-designed graphic interface, artificial intelligence, and game-saving functionality
- + Used: Javafx, XML, Android Studio

PROFESSIONAL DEVELOPMENT**Undergraduate Student Alliance of Computer Scientists, Member**

- + Participated in workshops led by students, alumni, professors, and industry representatives on a variety of technological topics not covered in computer classes
- + 1:1 mentorship matching underclassmen with upperclassmen to provide students with holistic mentoring on academic success, career and personal development, and technical knowledge
